

PT260

Thickener

The PT260-X has a 150mm maximum thickening capacity and a generous 400 x 260mm working table made of cast iron for solid support.

Extraction and Guard Hood

This fits quickly and easily for thickening and engages a micro-switch to ensure it is in place before use.

Cutter Block

The PT260-X features a 2 knife cutterblock with re-sharpenable, removable blades. The feed mechanism features noise reduction slots and anti-kickback teeth which prevent the material being thrown back when thickening.

Fence

The fence can tilt from 0-45° on a positive stop to make re-setting an easier task.

Tables

Hardened 1m long tables are treated to reduce friction, allowing easier movement of stock.

Wheel Kit Included

A pedal operated wheel kit is provided as standard allowing the machine to be easily re-positioned in the workshop for cutting long lengths of timber or whenever a change of position is required.
