

TS250RS

On the Inside

Not all machines are the same. Whilst looking impressive from the outside, it is what's on the inside that really counts and Record Power table saws are much more heavily made than competition at the same price. Make sure you research alternatives thoroughly and look inside if you can.

Optional Squaring Table

The optional squaring table comes with swinging arm support, extendable cross cut rail and flipover stop to easily and accurately handle large sheet materials.

Rise and Fall

Separate rise and fall table tilt handwheels - providing smooth and accurate control via thick steel bars with rolled acme threads for fast smooth action.

High Quality Sliding Beam

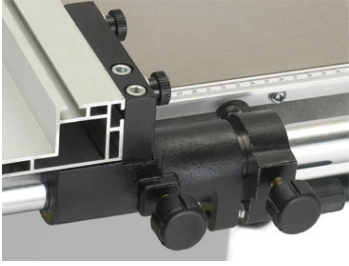

The sliding beam rests on a substantial mount offering smooth and accurate operation. Stroke is generous at 1225mm and can cut 10' x 8' sheets across the width.

Beam Stop

The Sliding beam features a sturdy stop allowing the beam to be held in position safely when sliding action is not required.

Standard Configuration

TS250-RS shown in standard configuration.

Robust Fence System

The heavy extrusion is fixed to a solid cast iron mount and fitted with micro-adjustment. The whole unit slides smoothly on an industrial style solid steel bar, which has adjustment that will stay put once set.
