

## DP25B

### Compatible with Drill Press Vices

The DP25B can be used with drill press vices, ideal for accurate boring in many different materials.

### Tilting Table

Drilling at angles up to 45° is possible thanks to the tilting table.

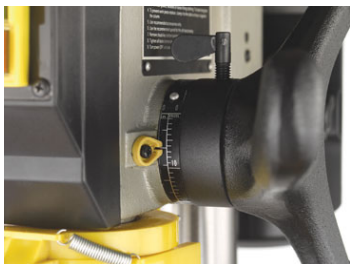

### Pulley System

The 5 speed pulley system, easily accessed from the top of the head unit, provides a good range of speeds for cutting a wide variety of materials.

### Extra Capacity

When extra capacity is needed, the table can be easily moved out of the way to allow the base to be used.

### Locking Collar Depth Stop

This depth stop makes accurate repeat boring simple and easy to achieve.

### Rack and Pinion Rise & Fall

The rack and pinion table support, a mechanism usually found only on much larger machines, gives excellent performance and value for money.
