Despre produs

These 3 flute end mills are manufactured from carbide and are ideally suited for machining non-ferrous materials such as aluminium, bronze, lead and copper. Available in a range of sizes and specifications, each end mill is uncoated with a corner radius of 0.2mm and a 45° angle. Features and Benefits

- o Perfect for non-ferrous applications such as machining aluminium, copper, lead and bronze for versatility of use
- o High material removal rates for quick machining
- o Ensures a smooth surface finish for accurate and precise machining results
- o Polished flutes for optimised chip evacuation
- o Excellent chip flow to avoid material blockages

Typical Applications

- o Ideal for use when machining aluminium, copper, bronze, lead or similar non-ferrous materials
